MAKE U IN

Maker Education supporting inclusive environments at primary school

Target group

The project is addressed to primary school teachers and educators with a basic literacy in Maker Initiatives who seek to explore their inclusive potential.

The project

The project MAKE U IN – Maker Education supporting inclusive environments at primary school is a Small Scale Cooperation Partnership in the school sector (KA210-SCH) funded under the Erasmus+ Programme.

The MAKE U IN project aims at strengthening the role of primary school teachers in designing inclusive educational environments, exploiting the potential of Maker initiatives.

The main concrete objectives are:

- To increase primary school teachers' awareness of the inclusive potential of Maker-based activities for disadvantaged students
- To enhance teachers' knowledge, skills, and competencies in integrating maker-based activities to improve student participation, engagement and inclusion.

The activities carried out

MAKE U IN – Resource Repository

The Resource Repository is an online space, accessible via the project website, that offers a comprehensive guide to support inclusive making in educational settings. It provides primary school teachers and educators with theoretical insights, practical tools, and real-life examples to help them implement accessible, student-centered maker activities.

The content was developed based on qualitative research carried out by the MAKE U IN project partners. A total of 35 participants – including primary school teachers and experts in maker education – took part in local focus groups held in Germany, Spain, and Poland.

MAKE U IN – Transnational project meeting

The Transnational Project Meeting was organised in Munich (Germany) on 5 and 6 May 2025, hosted by the project coordinator (FabLab München).

All the key aspects of the project were covered, along with the launch of the second activity: the “MAKE U IN Learning Sessions.”

The activities carried out

MAKE U IN – Learning Sessions

The MAKE U IN Learning Sessions are currently delivering in Germany, Spain, and Poland to enhance teachers' knowledge, skills, and competencies in integrating maker-based activities to improve student participation, engagement, and inclusion.

The face-to-face training combines theoretical knowledge with instructions on how to use the MAKE U IN Resource Repository platform to implement inclusive maker-based activities.

MAKE U IN – Launch Conferences

In the coming months, the project partners will organise local conferences in Germany, Spain and Poland focused on MAKE U IN materials and the benefits of inclusive making in educational settings.

If you are interested in attending a local event, please contact the relevant partner.
